It was a new course, so I was okay with the planning not being too strict. It was nice to sidetrack and especially learn how to simplify complex material

Was nice to have a course that did not require too much time to prepare, but still managed to be interesting.

The study plan could be done better, but it is understandable how the course went out, since the basis knowledge of students varies and the topic is quite broad across the lectures.

Question 22: Short Answer

What study programme are you enrolled in (e.g., Computer Science, Mathematics, Applied Mathematics, Mathematics)?
